### Here and There

The British Columbia Chapter of the I. O. D. held its "coming of age" meeting at the Empress Hotel, Victoria, recently, at its twenty-first annual convention. Premier Pattullo welcomed delegates from all over the province, and many distinguished guests were present.

The annual reduction in cost of summer railway travel under the heading of low summer fares, will be put into effect by the Canadian Pacific Railway on May 15th next, according to official announcement. The reduced fares will have extensive limits and stopovers.

Fort Hope, on the south bank of the Fraser River, ninety miles from Vancouver by the Canadian Pacific, is a place where the Almighty has most lavishly set down in a land of wonderful beauty rivers and lakes abounding in game fish, writes R. Bruce Kennedy, editor of Western Fisheries.

Dr. Frank N. D. Buchanan, leader of the Oxford Group movement, is expected to launch another campaign in western Canada this Spring, commencing at Winnipeg May 15th, and visiting Regina, Saskatoon, Calgary, Edmonton, Vancouver and Victoria, and culminating with a selective "house party" at the Banff Springs Hotel early in June.

**DON'T BUY IN THE DARK.

### The First of the Season.

At exactly 10.40 a.m. Saturday it looked as if the racing season had opened rather early this Spring, when a pair of three-year-old bay ponies speeded past the Sun office at about 85 m.p.h., and again up hill, at that. At the next block it looked as if O.H.M.S. corner was in for a new indentation, as the ponies swung around with the accompanying farm vehicle, missing the obstructions by a hairbreadth. The team became bunkered a few miles from town, where the owner captured 'em.

### The New "A-C" Cafe.

Stony Plain is shortly to have another place where the natives and visitors may dine. The location of the new Eatery is on Main St., next the Phone exchange. Two of the town's young gens, Hilding and Magnus Larson, have pooled their capital and will open the new emporium for interior decorations on or about the 20th inst. Each of the two have had several years' experience catering to restaurant patrons, and as the two are fairly well known to all, and particularly to the sporting fraternity, there is reason to believe they will make the venture a success.

### A Farmer Returns.

Mr Jacob F Bauer, a former resident of this district, has returned here with his family and outfit. Jac came here originally from the dried out area to the southeast about 1928, and was a tenant on the Ph Litzenberg farm, west of town. Jac left here in 1932 to occupy a "S S B farm in Leduc district. This land has been sold by the Board, and Jac was forced once more to travel. He is now seeking a suitable farm on which to locate.

### "Smiling Through."

Stony's movie fans are to have a treat when Mr Goodwin's show comes to town on Friday, May 25th, at Moose Hall. The picture billed for this date is called "Smiling Through," with Norma Shearer in the leading role. Others in the cast of this popular picture are Frederick Black and Leslie Howard. Those fans who have seen Norma Shearer in her other successes will not miss seeing her in "Smiling Through," which is said to be her greatest. Moose Hall, Friday, May 25th.

### Christies on Tour.

Mr and Mrs Christie started out last week on a motor trip which they expect will take them thru most of the northern cities on the Coast, including Victoria. Each of the couple have relatives in several of the American coastal cities, and they expect to pay these a visit. The two children George and Violet accompany their parents on the trip.

## HARDWICK'S

Women's Peanut Straw Garden Hats, wide rim, nicely bound, special, 19c.

Also Peanut Straw Hats for Girls, Little Boys, Boys, and Men; all sizes and styles, at 19c each.

Women's Fine Donegal Kid 1-Strap Slipper, E width, sizes 3 to 7; Sale price, \$2.25 pair.

Girls' Black and Blue Drill Whoopies, neatly bound; 13 to 20 years, \$1.25.

Boys' Navy Blue Speedway Sport Pants; sizes 13 to 20 years; \$1.15.

Men's Merino Combinations; Summer weight; sizes 36 to 44; \$1.15.

Grocery Specials; Lots of them.

## Get It at HARDWICK'S.

Agents Alberta Dairy Pool.

## SOUTH EDMONTON BEACH

Store and Dwelling Attached, and Dance Hall, Double Water Chute and Four Boats, Ice House and 8 Tons of Ice. \$1,500 Cash, or \$1,800 on Terms.

"Fresh from the Gardens"

## Japan Menaces World Peace

World opinion apparently is agreed that Japan is engaged in intensive preparations for war, primarily with Soviet Russia, and with hegemony of Asia and the Pacific as the direct objective. The evidences cited in support of that opinion are amenable to no other interpretation. There is no gainsaying the fact Japan has embarked on an imperialist policy strangely reminiscent of that which agitated pre-war Europe and which brought civilization to the verge of catastrophe.

Even the time has been set, it is claimed, by Japan's military experts. Armageddon will be let loose in the Orient late in 1935 or early in 1936. A world still struggling to escape the fitter aftermath of a Great War then, at no far distant date, will be faced with another which, unless due precautions are taken, may complete the havoc of the last. The chancelleries of the world, the House of Commons at Ottawa, economists and statesmen generally, are satisfied Japan is headed for war.

What are the evidences which have provided front page stories for newspapers, leading articles for editors and journalists, texts for sermons and subjects for radio lectures, and which point so unmistakably to war in the Far East?

Ever since its Shanghai and Manchuria adventures, Japan has been showing its hand, and has made it plain that establishment of a dummy kingdom, Manchukuo, under its puppet emperor, did not satisfy Nipponese ambitions with respect to the Asiatic mainland. Withdrawal from the League of Nations was but a considered step in a pre-conceived plan which envisaged war with Soviet Russia as a necessary preliminary to further imperialistic expansion. The recent ultimatum to the great powers designed to prevent financial or armament aid to China, is indicative of the fact that Japan proposes to exercise complete tutelage over that vast territory. The ultimatum, construed as a trans-Pacific "Monroe doctrine," directly affects Great Britain and the United States, of which have far greater financial interests in China than has Japan.

Furthermore, Japan is arming at greater speed than any other country in the world. More than 40 per cent. of its budgetary expenditures are earmarked for armament purposes. The Nipponese air force is among the most potent in the world. It is asserted the Japanese government is about to demand naval parity with Great Britain and the United States. So far as armaments are an augury, therefore, they point to not far distant war.

What of the economic aspect of the situation, perhaps the most significant of all?

That Japan should have imperialistic ambitions is, of course, a direct sequel to its adoption of western "machine" civilization. The growth of its industrial plant and productive power has been accompanied by a rapid growth of population. In ten years, Japan's population has increased from 56,000,000 to 66,000,000. It presses upon the resources of the country. Strangely enough, it has reached the same point at which Germany felt the urge for "elbow room" at all or any cost.

The entire population of the Japanese islands has been enlisted in a gigantic effort to capture world markets. Systematic inflation of currency, ruthless exploitation of the masses, are component parts of the state's mechanism for development of export trade. Japan's exports have doubled themselves in three years. Against the flood of cheap Japanese goods, loosed upon world markets at "murderously low prices," tariff barriers have proved unavailing. Seventy per cent. of Japan's production is exported. Britain and Germany, even in the heyday of their foreign trade expansion, never exceeded 25 per cent.; the United States never has exported more than 10 or 12 per cent.

"Such a mass attack on world trade contains the seeds of its own destruction," says one writer who believes "the foundations will crumble beneath such expensive export trade maintained by the most fantastic exploitation of the native population. Through forced labor, child labor, sweat-shop conditions, generally, Japan is selling abroad at less a production costs—in Japan! The government is behind the productive machine and the export program. Because of its actions, capital equipment (convertible to war purposes) multiplies, dividends are high, while workers slave and their families starve.

How long will it last? The "machine" is geared to run until Japan is ready for war. It would appear to be in a race between preparedness on the one hand and national breakdown and insurrection on the other. War will be declared on first threat of the internal crash.

Thus international experts read the handwriting on the wall. Can the counter-motion for peace gain weight enough to prevent the catastrophe before Japan has reached the breaking point?

## Abbey Gets Milk Bath

Historic Westminster Abbey recently received a milk bath. Workmen applied gallon after gallon of skimmed milk to its massive arches, pillars and even its statues. The treatment, recommended by architectural experts, was intended not only to clean the stone work, but to aid in preserving it. The results will be watched with care, although it is said five years must elapse before the value of the treatment is apparent.

## What Eating Costs

Here is something to worry about. If you only spend an average of 25 cents per meal during your lifetime, it costs you \$19,250 to satisfy the "inner man." Average individuals eat 77,000 meals in a lifetime, according to statistics compiled by M. Davies, who presided at a meeting of market and grocery owners, restaurant and hotel men, national refrigeration experts and city health authorities at Cincinnati recently.

## Old London Growing Fast

Every Year 150,000 People Added To Big Metropolis

Figures have been quoted by American statisticians to show that within 50 years New York will be a larger city than London. Presumably that means Greater New York and Greater London, because the working population of both cities, as is the case with all large centers, is, owing to vastly better transport services, living in the outer rings of the business areas.

New York is still about a million and a half behind, and if it is going to catch up on London it will have to go some.

Lord Ashfield, the Englishman who once drove a street car in Detroit, and who is now the chairman of the London Passenger Transport Board, has to know exactly the traffic needs of Greater London. He told an audience the other day that London is attracting new industries at the rate of 1,000 per annum. London doesn't ask for them. They just want to locate in the midst of the largest assemblage of human beings in the world. By this means 750,000 people have been added to the population within the past decade, and there are 50,000 new houses built each year.

London is growing so fast, therefore, at the rate of 150,000 persons a year—virtually another big city is joined onto London every twelve months.

At that rate plus the present million and a half advantage, New York is engaging in a hopeless chase if trying to overtake London.—St. Thomas Times-Journal.

## Another Fad Diet

Bananas And Skim Milk Latest Idea

One more is added to the list of fad diets for reducing. This one, consisting of bananas and skim milk, is reported to have the recommendation of a physician connected with the Johns Hopkins University. Bridge table conversations doubtless may be depended on to spread the new skim-milk-banana gospel.

Both the banana and milk deprived of cream are acknowledged to be wholesome foods. But the fact remains that there is real danger in issuing for general application any prescription no matter how great the authority as indorsing it. What may be good for one person for accomplishing any particular change, may be positively harmful to another seeking the same result.

Those who want to reduce should not take the advice of a friend even if that advice is passed on from a physician's direction based upon a careful physical examination. The same physician might give entirely different advice to his patient's friend.

## OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by drinking more water, or eating easily or chewing gum, or roughage. When liver's out of kilter, you'll feel it through—and you need a liver stimulant.

Cartier's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. Use all directions.

## Unusual Use For Honey

As Foundation For Golf Balls It Is Excellent

The uses to which honey is put are many and various, but perhaps the most unusual is in making golf balls. The honey is placed in a round stout rubber sac and is forced in under tremendous pressure. As the sac is used the rubber is wound and it has the ordinary outline. It is said that honey being non-evaporable and virtually unaffected by time or temperature will give a ball that will stand up under all conditions.

"My husband wired me from Paris on my birthday asking whether he should buy me a Rembrandt or a Titian. Now, which would you have?"

"Well, as far as that goes, most of these French cars are very good."

According to astronomers, our earth appears blue to the people, if any, on Mars.

## Ease Pain, Headache in Few Minutes

1. PEG, I'M FRANTIC, THIS WORK MUST BE DONE—AND I'VE A SPLITTING HEADACHE.

DON'T WORRY, GET SOME ASPIRIN TABLETS AND YOUR HEADACHE WILL BE GONE BEFORE YOU KNOW IT...

2. LATER

LOOK WHAT I'VE DONE, PEG... ASPIRIN SUITS STUPID THAT ANNUAL HEADACHE IS A JIFFY... NEVER FELT BETTER!

I KNEW IT WOULD! ASPIRIN IS THE QUICKEST SAFE RELIEF FOR PAIN KNOWN...

## For Quick Relief Say ASPIRIN—When You Buy

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, it is said, yet discovered.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And this is ready for you to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

## Radio Is Still Wonderful

People Who Think Never Fall To Get Thrill

The public has heard so many wonderful broadcasts transmitted across oceans and continents that it has grown blasé and almost ceased to get a thrill out of radio nowadays. But those who still live to a bit of thinking must be hard-stilled indeed if they fall sometimes to be moved.

In connection with the previous Byrd Antarctic expedition there was a remarkable incident. The New York Times radio editor was sitting in his home in Brooklyn talking to Byrd by means of short-wave. In order to avoid interruption from the office he took his telephone receiver off the hook. The office wanted to call him up but couldn't. The office was also in communication with another member of the expedition, so they gave him a message to relay to their staff man a few miles away. They told the man in the Antarctic to tell their radio editor in Brooklyn to hang his receiver up as they wanted to talk to him. So the message to a man four or five miles away went very nicely to the South Pole and back to New York in a few seconds.

There are still some thrills left, even in radio.—St. Thomas Times-Journal.

## Famous Painting Found

Picture By Millais Passed Out Of Notice In 1875

After many years of search, Millais' famous picture, "No. 1," is now owned by the sister of the model. The picture which was the chief topic of the Royal Academy Exhibition of 1875, shows a young woman reading a letter in which she has refused a marriage proposal. The original sitter was Miss Dorothy Tennant, who afterward became Lady Stanley, wife of Sir Henry M. Stanley, the explorer. It was once sold for \$7,000. The recent buyer was Mrs. F. W. Myers, sister of the late Lady Stanley. She had been searching for it for years, but it passed out of notice when bought privately shortly after the 1875 Academy Exhibition.

## Belgium Protects Frontier

The plan for fortification of Belgium's frontier, extending French defenses along the German line underway for the past 15 months is rapidly nearing completion. Several hundred concrete pill-boxes are being constructed all along the border.

## Library Of Small Books

A miniature library of 6,000 books, few of them larger than a postage stamp, has been collected by a Massachusetts man. The books include a complete Bible and all of Shakespeare's plays.

## Removes Brain Tumor

Marvel Of Surgery Reported From Leningrad

Removal of a brain tumor from a young girl under local anesthetic by Prof. Polenov at the Leningrad Institute of Traumatology was hailed as a marvel of surgery.

The tumor, the size of a pigeon's egg, was in the middle of the fourth ventricle, and threatened the patient with blindness. To obtain access, the surgeon had to displace the great hemispheres of the brain. The patient was apparently completely relieved.

Few precedents for this operation are cited in world medical annals.

## A Novel Clock

An amusing clock has been designed which at first sight resembles a picture of rather modernistic "flowers," a group of stems springing from the base, curve over slightly and sprays over the clock face so that the blossom topping each falls into the place usually occupied by the numerals. The clock hands are shaped like two slender leaves. This novel clock is said to be quite easy to read.

Mail coupon today for this new Catalogue. Profusely illustrated, featuring the latest in saxophones, piano scooters, guitars, etc., and all accessories. The most complete catalogue published.

## A Tired, Worn Out Woman Can't Make a Happy Home

There is no happiness in the home when the mother is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, has shortness of breath, faint and dizzy can't sleep, and gets up in the morning feeling as tired as she went to bed, and is downhearted and discouraged.

Milburn's B. & N. Pills will soon convince women it is not necessary to suffer, as they build up the nervous system and bring back the former health and vigor.

MILBURN'S  
HEALTH  
PILLS

## Over Six Million Trees Being Distributed This Spring Among Farmers Of Prairie Provinces

Dust storms sweeping across the three prairie provinces will soon have another obstacle to contend with as 6,000,000 broad leaf trees and 200,000 evergreens find a resting place somewhere in the different farming areas of Alberta, Saskatchewan and Manitoba.

From 300 to 400 bales of trees will leave the forestry station at Indian Head and its sister plantation at Sutherland to farmers who have interested themselves in trees for the sake of their beauty, and also as a method of combating the dust storms that have been playing havoc in the three provinces for some time.

A recent census of farms of the three prairie provinces covered by the forestry scheme show that of the 288,079 farms, nearly 200,000 of them are not wooded. Since its inception in 1901 the forestry farm has supplied 10,453 of these with at least some trees. There are still close to 150,000 to be supplied.

Since its inception the forestry farm at Indian Head and Sutherland, have supplied 115,190,070 deciduous or broad leaf trees and 2,088,306 coniferous or evergreen trees to the farmers of the three provinces.

Drouth has had its effect on the work and in such areas the demand has been somewhat lessened, but the officials believe that as soon as normal conditions prevail the demand from these areas will be greater than ever. Where trees were planted before the drouth people have not been as hard hit as in other parts as it was always possible to grow a good garden where a shelter belt had been set out.

Loss of the inspectors as a result of an economy move is partially being overcome by keeping in close contact with the parties receiving trees, by mail and submitting them to different questionnaires regarding growth, etc. In this way close to 90 per cent of the people interested are heard from and data gathered for reference work.

All the labor is not in the shipping of the trees. Before the evergreens are shipped out they have reached an age of four or five years. Pines are four years old when they leave the farm. Maples and caragana are the speediest and require only a year's growth before shipping. Ash and elm require two years. Poplars and willows are shipped from cuttings.

Machine-like precision is the feature of the shipping department as between 25 and 30 men ship out the 6,000,000 trees in just over two weeks of time. Out in the plots the evergreens are lifted and the roots are soaked in mud to preserve them. From here they go to the first shed where they are sorted into the right sized bundles, labeled and addressed. Then they are tied. Next is the wrapping and sewing and thence into the truck for delivery to the freight sheds. And so to the farmer.

When the shipping is done another round of work starts for forestry officials. Farm locations on the active planting list for 1935 number 5,000. Before the next season rolls around these will all have to be communicated with and all particulars necessary to the successful culture of the trees ascertained. Then a planting plan is made for each individual farm with suggested arrangement and all particulars for the best methods of growing, etc. to ensure as great a return as possible from the trees sent out.

**Making Synthetic Diamonds**  
Professor Oduello Fernandez, head of Madrid (Spain) University's pharmacy faculty, reports progress of chemists in making "small diamonds" synthetically, and believes larger synthetic diamonds are a commercial possibility of the near future.

Two men sat at the bar drinking liquor. Presently one of them said: "Do you know, Dick, I think I'll buy this hotel."

"Wait till we've had a few more drinks," said Dick, "and I'll sell it to you."

W. N. U., 2048

### Frozen Terrain Of Arctic

**Russia Opening New Trade Route Across Northern Siberia**

Russia is reaching out to make use of her frozen territories in the Arctic, it was revealed by Dr. Otto Schmidt, leader of the Soviet scientific expedition shipwrecked on the ice floes of the north while opening a new trade route around Northern Siberia.

Using heavy ice breaking ships, the Soviets hope to open vast resources of gold and oil in frozen Siberia, using the ports of Vladivostok and Archangel, he said.

The brown-bearded man who kept up the morale of more than 100 Russians when they were stranded for many weeks on the hazardous, ever-splitting ice floes of the Arctic ocean by the wreck of their ship, the Chelushkin, said he hopes to come back in a few months with a new Soviet expedition to complete his scientific and exploratory work.

Three nations within the territory his "Wrangel" Island expedition sought to open, before they were stranded on the ice, then rescued by an airplane expedition.

The United States navy in cooperation with the coast and geodetic survey, plans to map the rocky Aleutian Islands this summer. It is common talk Japan keeps a wary eye on the territory. Now Russia reveals she can cover it by airplane and boat, through the Schmidt expedition and the rescue forces under command of Professor George Ushakov.

### Dickens Liked Canada

**Famous Author Was Visitor Here Eighty-Two Years Ago**

On his arrival in Montreal nearly a century ago Charles Dickens, English author, was impressed by Canada's quickly changing seasons and by the permanence of Montreal's roads, buildings and public works. One proof of this statement is that Racine's hotel where Dickens himself stayed at that time is still standing, forlornly perhaps, but none the less a memento of the famous writer's visit.

Dickens arrived in Montreal from Toronto early in May 52 years ago to help a local theatrical company who had extended him an invitation to aid them with his advice. In his letters home Dickens dealt pleasantly on the different stages of his journey and of what he met with.

He told of how Montreal was situated, about the streets and shops and different suburbs, and was enthusiastic about his Canadian visit generally. At one point he wrote "spring comes so rapidly here that it is but a day's leap from barren winter to the blooming youth of summer."

By Ruth Rogers

SMART JACKET DRESS

Slenderizing lines for matrons or for younger women rather heavy of figure.

So simple to make is this charming jacket dress for to-day's pattern. Trickily bias lines create a very slenderizing effect. The sleeves can contrast or be of self material and look very charming.

The original in twin prints in navy and white crepe silk is very practical and smart. It will carry on all through the summer. It's perfect for week-end vacations and travel.

Other lovely schemes in cotton prints, pastel and white tub silk, linen prints, etc., are smart and inexpensive for your summer wardrobe.

Style No. 677 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3 1/4 yards of 39-inch material with 3/4 yard of 39-inch contrasting. Separate coat requires 2 1/4 yards 39-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

A butterfly has organs of taste in its feet.

The hunting preserve of one red ant colony may cover 17 acres.

## United States Scientist Predicts Period Of Great Floods, Based On Effect Of Huge Sunspots

### Canadian Claims Priority

**Montreal Resident Says She Was First Woman Journalist**

Recent press dispatches which spoke of an American, Mrs. Anne Royall, as the first woman journalist and the first of her sex to own and edit a newspaper have stirred the ire of Mrs. Kate Massiah, resident of Montreal.

On both counts Mrs. Massiah claims priority over Mrs. Royall. In addition she claims to have been the first journalist of either sex to be a professional "interviewer."

"I began in October, 1871, on the Montreal Herald and was interviewing from that till 1878, when I was married," said Mrs. Massiah.

In 1858 I was editor and proprietor of the Independent in Lachine, Que., which beats out Mrs. Royall by some years. Before that I was assistant editor of the Lachine Watchman.

In 1879 I reported the proceedings of the House of Commons from the Speaker's gallery. I covered the debates on the national policy.

"I was the first woman to be member of a press association. That was in September, 1869."

"There are several other facts to my credit and I am just old enough to want credit placed where it is due."

### Grade C Eggs

**Always A Demand For Low Priced Eggs**

A feature of the egg market at the present time is the heavy demand for grade C eggs, says the Department of Agriculture Egg and Poultry Market Review. There is, of course, always a demand for these low priced eggs, but it seems to be accentuated this year by the fact that supplies of this grade are relatively scarce. The weather this far has been cool and comparatively few poor quality eggs are being marketed. The eggs going into grade C at the present time are degraded chiefly on account of size or dirt. The producer, in most instances, is not able to exert any individual control over egg size, but dirty eggs can be avoided by reasonably clean production conditions and would result in considerable extra profit to the producer.

### Rome Celebrates Birthday

The 28th birthday of Rome was celebrated April 21. Premier Benito Mussolini inaugurated many public works and accepted on behalf of the city a monument to Simon Bolivar, erected outside the national stadium by Venezuela, Peru, Ecuador, Chile, Colombia and Panama.

Great floods throughout the world in 1936-37 were reported by Captain Thomas J. See, veteran professor of mathematics in the United States navy. He based his forecast on the effect of huge sunspots.

Rainfall will increase for the next two years, after which the floods will occur, said Captain See, adding that the sunspots cause the weather variation by mixing hot and cold air through lessening the heat of the earth, thereby permitting the cold currents of air to descend.

Captain See, with 45 years' experience in scientific work, collaborated for many years with the late Rev. Jerome S. Ricard of Santa Clara University in the study of Father Ricard's theory that sunspots cause weather changes.

"Since the decrease of sunspots began in 1928," Captain See declared, "very great drouths have been observed in nearly all the countries of the globe, notably the drouth of 1930 in the Mississippi valley, which accentuated the evils of the depression, and that of 1933, which delayed agricultural recovery."

"But now large sunspots have appeared, and will increase for the next four years, yielding vast floods in 1936-38, and an increasing rainfall this year and next, after which the floods will become notable, as during the Mississippi floods of 1927."

"The sunspots mix hot and cold air much like the mountains, yet act in a slightly different way, by cutting down the heat of our globe, thereby letting the cold currents of air descend nearer the earth, for making more rain. That is the whole meteorological effect of sunspots."

### Admires Canadian Rockies

**Thrilling Ski Journey Across Coast Range Of B.C.**

High lights of a thrilling ski journey across the coast range of British Columbia from Taita, B.C., were given by Sir Norman Watson, of London, England, speaking under auspices of the United Service Institute of Ottawa.

Sir Norman was enthusiastic with regard to the possibilities of British Columbia as a paradise for the ski devotee and also expressed the view that Banff could become the St. Moritz of the Dominion.

How blizzards were defied by the Alpine ski party were explained by the speaker. He said that at one time it was necessary to cut 2,000 steps in the fury gap ice wall and also dwell on the hardship of a struggle through dense bush to Knight's lake.

The distinguished visitor remarked that he was empire-minded in many things and this applied to skiing. He thought the scenery of the coast range was unsurpassed in beauty and was unexcelled as far as skiing attractions were concerned in the temperate zone.

### Established Eight Centuries

**Smithfield Meat Market In London**

Most farmers throughout the Empire have heard of Smithfield Market, or of Smithfield Show. Smithfield is London's meat market not very far from St. Paul's Cathedral, but the show of that name held at Islington, quite a long way from the meat market, and is merely a Christmas cattle display which has no connection with the meat market other than adopting the name.

Smithfield Market is the largest dead meat and poultry market in the world. Last year over 458,000 tons of meat and poultry were handled there. Four out of every five carcasses of Australian and New Zealand mutton and lamb went to Smithfield, and two-thirds of the chilled beef reported from those countries and from the Argentine.

Around Christmas time as much as 5,000 tons of meat and poultry are sold there in one day. The annual wholesale value of supplies amounts to about \$175,000,000.

There has been a cattle market at Smithfield for over 800 years.—St. Thomas Times-Journal.

Lord and Lady Baden-Powell are shown returning to England after a long cruise in the Mediterranean with 700 scouts and guides. Lord Baden-Powell, who has been seriously ill, is shown being assisted by Lady Baden-Powell. The Chief Scout is to visit Canada next year to his health permit.

## CONSIDER PLAN TO STIMULATE TOURIST TRADE

Ottawa.—A \$200,000 federal advertising and publicity campaign in support of the tourist industry throughout the Dominion is to start immediately, was advocated before the senate tourist committee by Theodore G. Morgan, Montreal, chairman of the executive committee of the Canadian Association of Tourist and Publicity Bureau.

The senate committee, under the chairmanship of Senator W. H. Dennis, Halifax, is engaged in formulating a plan for national consideration of the tourist industry, supplementing the present activities of the provinces' transportation companies, automobile clubs and various individual organizations.

It had been suggested that a federal tourist department of advertising, publicity and development be established to supplement the activities of the provinces and local organizations.

The campaign for this year should be pushed immediately, said Mr. Morgan. The summer tourist traffic also commences in May and builds up throughout June, July and August. An immediate campaign would not only be effective this year, but would stimulate fall and winter business, and should be continued into 1934.

Based upon financial returns to Montreal from the expenditures of the Montreal tourist bureau, Mr. Morgan advanced \$200,000 as a minimum amount that should be appropriated for a 1934 campaign. He further suggested that \$500,000 expended annually by the Dominion in newspaper and magazine advertising for tourist trade expansion would be more than justified by the increased business that would follow.

This estimate was based upon an appropriation for advertising and publicity of five per cent. of the total annually expended by tourists from outside the Dominion, apart from inter-provincial tourist traffic. The Dominion bureau of statistics estimated the 1933 tourist business at \$100,000,000.

J. Van Wick, general manager of the Canadian National hotel department, told the committee that summer tourists from the United States spent \$350,000 in Canadian National hotels last year. Newspaper and magazine advertising to attract this business had been \$15,000.

## Accepts Invitation

**St. Lawrence Suite To Be Played By Toronto Symphony Orchestra**

Toronto.—Wilfred C. James, manager of the Toronto Symphony Orchestra, announced that Percival Price, Ottawa carillonneur, has accepted an invitation that the orchestra play his "St. Lawrence" suite at the opening presentation of the 1934-35 season.

The invitation, Mr. James said, was made by Dr. Ernest MacMillan, conductor of the orchestra. Price's "St. Lawrence" won him a Pulitzer scholarship valued at \$1,500. It was rejected by the University of Toronto when Price submitted it as the means of obtaining his doctorate of music. Dr. MacMillan was a member of the committee that rejected the work.

## Discuss War Debts

**President Roosevelt Has Talk With Belgium And France Ambassadors**

Washington.—A re-statement of the United States' attitude toward war debts came from President Roosevelt and shortly thereafter the ambassadors of two nations that are in default—Belgium and France—called at the state department to discuss the matter.

The position outlined by the president called for an insistence upon payment by the debtor and a willingness to talk over their individual problems separately and give consideration, either to proposals for token payments or for new terms of settlement.

W. N. U. 2046

## More Confidence Needed

**W. Stanford Evans Places Responsibility For Depression Years**

Montreal.—Reaction from the war and the actions of governments in the following years are responsible for the four-year depression from which the world is beginning to recover and not failure of the economic system, W. Stanford Evans, Winnipeg, president of the Canadian Chamber of Commerce and leader of the opposition in the Manitoba legislature, told the Montreal Board of Trade.

Needed chiefly to-day, said Mr. Evans, was more confidence. If a business man could be given conditions under which he could lay out business propositions with security, the world would not be long in recovering.

Fortunately, he observed, there was reason for confidence. Canada had set its feet firmly on the road to recovery between April and July last year.

Discussing the economic system as it had obtained he admitted there might have been selfishness and smallness in business in the past but the ordinary method of conducting affairs by trial and error was preferable to the conception of planned economy as originated in Russia.

There had been intrusion in recent years of matters alien to the economic world. Some of these, he noted, had arisen from national policies or administrative regulations of an uneconomic nature not governed by economic consideration at all. Furthermore, there had been intrusion of ideas, of formulas, of generalizations and he warned against the danger of too freely accepting these ideas.

War, he stated, was not in accordance with the economic system. "It was not the economic system but the necessities of war which led to those extreme inflations of currencies which took place during the war in practically every country, until prices were carried to extreme heights," he said.

## Advice To Nurses

**Should Take Up Work In Smaller Places**

Montreal.—Nurses were advised to take up residence and practice in smaller places by Miss Elizabeth Smellie, chief superintendent for Canada of the Victorian Order of Nurses, at a dinner of the Alumnae Association of the Royal Victoria hospital here.

Schemes submitted to the legislature of British Columbia and Alberta appeared to indicate the coming of public responsibility in health matters, said Miss Smellie, and she wondered whether in future there would be two divisions, one for medical care, including hospitals, and the other for preventive work.

## Crude Oil Freight Rates

**Matter To Be Considered By Board Of Railway Commissioners**

Ottawa.—Proposed increases in freight rates on crude oil from southwestern United States to refineries in Western Canada will be considered by the board of railway commissioners in a series of hearings in Western Canada, commencing in Regina, May 22.

Afterward hearings will be in Edmonton, May 25; Vancouver, May 28; Calgary, June 1, and Winnipeg, June 5. Dr. R. J. McLean, assistant chief commissioner, and J. A. Stoenman, commissioner, will make the western trip.

## Host To Siamese Royalty

London.—The king and queen of Siam had luncheon at the House of Commons as guests of Captain Victor Cazalet, Conservative M.P., who was a public school colleague of King Prajadhipok at famous old Eton. It was believed to be the first occasion on which a ruling monarch had taken a meal in the precincts of the house.

## To Prevent Warfare

Calgary.—A resolution asking government control of key minerals as a method of war prevention, endorsed by the Vancouver Women's Canadian Club and the Calgary Business and Professional Women's Club, will be sent to the League of Nations Society, at Ottawa, for further action.

## CAUGHT AGAIN!

Undaunted by failure of two previous attempts to enter the United States, Hugh J. McLeod, Scottish war veteran, tried again. This time as a stowaway the Aquitania. He is shown at Ellis Island, after he had been captured. He wants to reach his wife in San Francisco.

## Student Wins Gold Medal

**Young Russian Takes High Honors At University Of British Columbia**

Vancouver.—A young Russian student, George Michael Volkoff, who first came to Vancouver in 1924, won the governor-general's gold medal, highest award for members of the graduating class at the University of British Columbia, it was announced. Volkoff, aged 24, had an average of 98 per cent. in all subjects. He had 100 per cent. in three subjects and took first class honors in physics and mathematics.

Volkoff was born in Harbin, Manchuria, where his father is professor in the Polytechnical Institute. He attended Lord Roberts school here and returned to Manchuria for several years before entering the university.

He has led his class every year and intends working for his master's degree here next session.

## May Use Own Judgment

**Britain Not Asking Dominions To Reduce Japanese Imports**

London.—Britain has informed Dominions of its proposals in regard to Japanese competition, but has made no request for similar reduction of imports by Dominions, it was stated. Further the government has gone in to ask Dominions to consider whether they would care to deal with Japanese competition on their own initiative.

Canada for one, has a considerable favorable trade balance with Japan. New Zealand takes a comparatively negligible amount of Japanese imports.

A strong demand for textiles shares on the London stock exchange and sharp drops in quotations of Japanese bonds were the first results of Britain's lately-declared trade restrictions against Japan.

## PRINCIPALS IN STRANGE CONTROVERSY

The Duke of Atholl (left), who ran a sweepstakes last year for charity and was fined by a London court, recently figured in the news when he related the coincidence of being fined £25 after being told by a police inspector to plead guilty and the fine would be £25. Sir Thomas Inskip, K.C., British Solicitor General (right) denied the Duke's statement, at which the Duke came back steadfastly adhering to his previous statement. Hence, a first-class controversy ensues.

## May Visit Canada

**United States Wheat Expert May Make Official Trip**

Washington.—Frederick E. Murphy, Minneapolis publisher and expert on wheat acreage reduction problems, may make an official visit to Canada this year, but the plan is being held in abeyance for the time being.

This was disclosed when it was learned Murphy will not visit Argentina this year as previously announced.

Murphy was a United States delegate to the London and Rome International Wheat Conferences, and it was intended originally to send him to Argentina to explain to officials there the details of the acreage reduction programme now in effect in the United States.

In official quarters it was learned the publisher of the Minneapolis Tribune probably would not go to Argentina because the planting season in that country already is well advanced, and his presence there would not have the practical value it might had if he had gone earlier in the year.

## Salaries Of Bank Employees

**Minimum Is \$500 And Maximum \$13,500 Per Annum**

Ottawa.—Salaries of bank employees in Canada ranged from a minimum of \$500 per annum for junior clerks up to a maximum of \$13,500 for managers, according to a statement tabled before the banking committee of the House of Commons by Jackson Dods, president of the Canadian Bankers' Association. The statement was filed in response to a request from Dr. Raymond Morand (Con., Essex).

Salaries for junior clerks ranged from \$300 to \$1,000; ledgerkeepers \$400 to \$2,500; tellers, \$500 to \$2,620; accountants, \$700 to \$4,000; managers \$1,200 to \$13,500; stenographers \$300 to \$2,000, according to the statement.

The methods of four different banks in respect to pension fund, living allowances, insurance schemes, etc., were outlined in the statement. The names of the banks were not given.

## Criticizes Wheat Conference

**Sir Herbert Robson Voices Views Of British Traders**

London.—An attack on the work of the wheat conference by one of the British delegates, Sir Herbert Robson, was construed as simply an indication of the attitude of the grain traders.

Sir Herbert, president of the London Corn Trade Association, voiced the views of the Liverpool and London wheat traders when he decried "government interference" with the wheat trade and declared:

"I must say I view with deep concern the increasing interference of governments with international trade."

He criticized the recent conference and a recent meeting of the commission in Rome "for concentrating" on price and quota schemes "rather than the production problem."

## CROP PROSPECTS FOR WEST SAID BELOW AVERAGE

Ottawa.—Reports received from crop correspondents throughout Canada at the end of April indicated that the prospects for the 1934 crop were below average, according to a report issued by the Dominion bureau of statistics. Since May 1, conditions had improved, however. Prospects were uncertain on the prairies.

Up to the end of April the most unfavorable conditions were reported in Ontario, Manitoba and Saskatchewan. In Manitoba and Saskatchewan, the crop prospects were lowered by the contraction of wheat acreage and the extremely unfavorable soil and weather conditions.

In Alberta the spring season opened very dry, but was widespread but not as general nor as damaging as in the other prairie provinces. Rains fell at the end of the month to benefit crops already sown.

There has been no noticeable improvement in crop conditions in the prairie provinces. The scattered precipitation was not sufficient to settle the top-soil and further dust-storms have occurred, especially in Manitoba and Saskatchewan. The prevailing dry soil drifting and the fear of grasshopper damage make prospects extremely uncertain. Conditions have been such as to lower the "intentions" expressed by farmers at the end of April rather than to increase them. This is especially true for wheat, although the rise in prices is partial compensation.

## Forest Fires In Europe

**Heavy Loss Of Life And Property In Three Countries**

Paris.—Forest fires, an aftermath of the serious drought gripping many parts of Europe, caused widespread damage and loss of life in three continental countries.

In Poland, flames destroyed two villages in Silesia and Malorasia. Three children lost their lives and many were injured as 400 houses were burned.

Fires starting in the dense forests of Roumania crept into the city of Campulung-Muscel, and the towns of Buzau and Silistra, taking a heavy property toll.

Strong winds fanned the flames at Campulung-Muscel and more than 60 houses were destroyed. Damage was placed at \$500,000. Shortage of water hampered attempts to curb the blazes.

Forests fires that laid waste 5,500 acres of pine, and threatened the valuable turpentine region southwest of Bordeaux, France, were believed to be under control. A 15-mile area near Belin and the small district of Archacchon was swept by the flames.

## Heavy Damage From Flood

**Peace River Has Risen Eighty Feet Above Normal**

Fort Chipewyan, Alta.—Sweeping buildings and trees in a mad rush, waters of the Peace River continued their record-breaking rampage as they rose 80 feet above the normal summer level at a point 100 miles west of here, reports reaching this point said. Never before in white man's knowledge or Indian's memory has the river reached such terrific flood proportions.

No lives were lost, but property damage is heavy. The flood meant the loss of the important spring muskrat catch to trappers who depend largely upon this for summer livelihood. Trees over 100 years old were swept away like matchwood as the waters struck after an ice jam of huge size gave way. Fortunately the area is sparsely populated, for had the flood been in the average riverbed agricultural community, nothing could have saved those in its path.

**Commands Cape Breton Forces**  
Sydney, N.S.—Inspector John McIntosh, of the Royal Canadian Mounted Police, just returned after spending six months in Regina in training, has resumed command of the Cape Breton forces.

### The Home Gardener.

To be a successful gardener (male) you need patience, perseverance, philosophy, a cast iron back, a neck that tans but doesn't blister, a smooth-smoking pipe filled with smooth-smoking tobacco, a nice shady spot and a willing helper, says a writer in the *Edmonton Journal*. A good mellow spot of ground and a few garden needs might come in handy, but aren't a real necessity to an expert gardener.

Adam was the first gardener, but he wasn't very successful for three reasons:

- (1) Sir Walter Raleigh hadn't discovered tobacco.
- (2) He had no male friends to boast unto.
- (3) There were no seed catalogues to tell him the Latin names of the things he grew.

As a matter of fact, he had to wait for a good hailstorm to show him which were weeds and which were vegetables or flowers. Some modern gardeners follow Adam's lead in this last respect, as it never fails. The weeds are always untouched by the storm.

The chief products of gardens are weeds, worms and bugs, and these should be encouraged. If you can't grow good, healthy weeds in a garden, it's a cinch you won't be able to grow anything else, and it won't be worth having a garden there.

The best weeds to have in a 1934 model garden will be shepherd's purse (empty because of the depression); pig weed and sow thistle (as hog products are fairly high). None of these weeds will need cultivating, and, once a good crop is grown and allowed to go to seed, better crops may be confidently expected each succeeding year.

Many worms will be available for the gardens this year, and care should be taken to plant plenty of early cabbages and green peas for the early cutworms. If you are fortunate enough to have wireworms, you will find that they'll thrive on almost any vegetable. Another interesting worm is the wee white chap who specializes on onions, and thereupon develops halitosis. None of these species will injure your weeds, so do not hesitate to encourage them.

Potato bugs will be worth watching this summer and, given a reasonable chance, they may be depended on to look after your potato crop for you. They will be on a 24 hour diet which consists of unlimited quantities of that Vitamin X found in potato plants. 1934 potato bugs are stream-lined for greater speed and cubic capacity.

### A Good Suggestion.

Letters addressed to newspapers sometimes get to the wrong department. An instance in point is that of the lady who wrote the House hold Editor, asking "How do I get green paint off my hands?"

Unfortunately, her inquiry got to the Advertising Dept. It, however, brought an immediate reply: "Why not use large space for a few days and offer it at a great reduction?"

### The "In-and-Out-er."

"The young farmer of tomorrow will, I hope, have ceased to be an In and Out-er. You know what I mean—a man who, when pork is high, rushes into pigs, and then when the horizon is darkened with pigs and the price is going down, is anxiously looking for some other chance to plunge, says Dean Howes of U. of A. If wheat is high he breaks up land which should be in pasture and which should never have been broken perhaps; and then when the wheat market slumps, well, he is ready to try something else. The man is not a farmer—he is only masquerading as one. I hope the hypothetical young man we are considering will save and invest soundly his profit when prices are good and that he will know better than to throw up his hands and quit because prices have gone down."

## OCCASIONAL WIFE

By **EDNA ROBB WEBSTER**  
Author of "Joretta," "Lipstick Girl," Etc.

### SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money until she comes of age and is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are strolling near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Avis Worth rents a studio on the same floor as Peter, and invites him to have lunch there. He accepts reluctantly, but is favorably impressed with his visit. Camilla urges Peter to accept some of her earnings to help him along, but Peter and she quarrel. After Camilla has gone from the studio, Avis Worth calls and persuades Peter to accept a loan of \$1,000. Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

### CHAPTER XLIII

Terry rebuked Camilla gently, when he danced with her. "Aren't you a little sorry for the way you deceived and then deserted us? I'll never be the same again, since I lost you," he sighed.

He was probably as sincere as he could be about anything, but

**Pepsodent**

Appleton PAPER PRODUCTS

HAMILTON, ONTARIO

W. N. U. 2046

Camilla knew that he could not have been deeply affected. "Perhaps it is just as well you are changed," she stunted him, laughing. "Besides, I didn't desert the crowd just because I married Peter. It was all arranged that I should soon drop out of your life long before that."

"Not if you had listened to me. I've tried to persuade you to marry me for two years. What's this absurd thing I hear about your working?"

"I am, and it's not the least bit absurd. It's wonderful. I never was so happy in my life."

"But that's not fair, you taking care of yourself when you are married. What's a husband for?"

"Oh, I'm saving him for the future," she laughed. "It isn't that Peter can't take care of me," she defended him. "I just won't interfere with his work now, when every day is so important to his career. Besides, I have my own ambition to work out and I don't want to interfere with that, either."

"What is an ambition? Do tell me, because I would like to recognize one if I saw it. Is it a disease, and can it be cured?" Terry ridiculed.

"Oh, I could tell you all about it, but you never would be able to recognize the symptoms. You should be ashamed of yourself, Terry Wayne, for being such a waster. Where do you suppose the money comes from that you spend?"

"Why, from the old man," he exclaimed, as guileless as a child discussing money. "Exactly. But did you never try to estimate what it represents of thought and effort, to provide you with so much?"

"Why should I bother about that? One person's thought and effort are enough to waste on it. What I think about these days is the fact that the governor has cut me about ten per cent and I can't convince him that my expenses are more instead of less."

"Everyone is trying to reconcile those two contradictory facts these days. Too bad for you that you don't have to earn your living for awhile."

"Say, what have you got against me, anyway? I know. Just because you have to toil, and want everyone else to break rocks. Must you be like that, because you have an ambition?"

"I just like you, enough that I'd like to see you be a man, Terry."

He drew her closer in his embrace as they ended the dance. "And I like you well enough that I still want you."

"Don't be silly," she protested, and turned her attention to someone else. All her old friends were delighted to see her again, Camilla discovered. They chided her for her neglect of them, were curious about her work, doubted or admired her seriousness. She gave them no details concerning her position, only that she did not copy for Weeks and Bowman. She did not wish Alexander Hoyt to discover at this crucial time that she held his fate at the point of her pencil.

The test would begin to prove itself soon. The first copy had gone out, and was already on the press, would appear in magazines all over the nation within the following week. Any upward trend of the Wheat Cereal Cereal business would manifest itself very soon if the juvenile public accepted her Tiny Tots with enthusiasm.

Both Weeks and Bowman were optimistic. "Of course," Mr. Bowman had conceded, "we can't expect enormous returns under present conditions. But if the idea catches on there is bound to be a decided improvement."

He was more generous with his praise than Mr. Weeks, chuckled over "the exploits of father and mother Tiny Tot and their large family, their friends, and relatives."

There were, among many others, Uncle Joe, the one-legged sailor, who told the children such fascinating tales; Aunt Min to whom all the children took their troubles, to be afflicted with delectable Wheatheart Cereal cookies and muffins; old Grumpy, the miser who hoarded gold and frightened the children from his wretched hut that lived them with its strange and fearful reports. They were so tiny that they slept in peanut shells and made a meal of one cereal flake, were delighted over a treat of a grain of sugar, made a palace of a cereal carton.

## HOLDS FALSE TEETH TIGHT AS CEMENT

Please can't possibly slip when you sprinkle on Dr. Wernac's Powder. Forgettable teeth-holding powder that they can't annoy yet so comfortable they actually feel as if they were never there. Special comfort-cushion prevents sensitive gums from getting sore. Brush out—any dentures.

While Camilla worked at her sketches, she lived in a different world, alone. Even Peter never entered there, except to hold his head over her thoughts and entice her away for a few moments at times. She lived her hours there with the children of her fancy and often left them with genuine regret.

During those first weeks, she was so engrossed that she worked late at the office many times. She discovered that when the pleasant, spacious rooms became silent for the night, she accomplished more work with better results. It was even more satisfactory than working at the apartment, which she did sometimes, also. No conflicting thoughts or duties interrupted her, and she grew to appreciate her own wisdom in living apart from Peter, so that he might work alone, also.

She was more concerned over the fact that Avis had come to live across the hall from Peter, than she admitted. Not so much because he was jealous of Avis' interest in Peter, but because she feared that her presence there would take from Peter just what she had sacrificed so much to provide for him, his privacy.

Fortunately, for her peace of mind, Peter never told her how many times Avis interrupted his work and insisted upon his relaxing for an hour in her company. These omissions in his confidences were not so intentional as they were natural. He had precious little time to do anything with Camilla in those days and, like all men, he did not realize himself how many hours he did pass in Avis' company. They were so casual and pleasant, conveniently interspersed with the evening hours, that he purposely arranged that he was scarcely aware that he saw more of Avis than he did his wife.

So, on the night of her reception, Avis took possession of Peter and ignored Camilla so casually that she never noticed or resented it. Everyone departed with gushing thanks for a marvelous evening, and vaguely impressed with the memory that Avis and Peter were their hostess and host. With Peter's studio across the hall and he a new tenant in the cottage, it did not seem at all improbable.

Avis insisted that Camilla, and Peter remain until the last guests had gone, then she turned her attention wholly upon Camilla. "I can't thank you enough for helping me so beautifully the evening so dear. It was too sweet of you, the way you got people together and helped to entertain them. Do stay with me for awhile, and while Tiny clears up the worst of the wreckage, we can have a bite together. I'm sure you didn't have time to eat—I know I didn't. But I think everyone did have a good time, don't you?" anxiously.

"No doubt about that," Camilla assured her with sincerity. "But I didn't do so much. I had a good time, myself."

"I'm so happy if you did. I'm afraid I rather neglected you, depending on you to help me as I did. It kept me pretty busy, telling everyone about Peter. Did you notice how popular he was?" she asked, pleased and impersonal.

"Oh, I say!" Peter objected. "It was you who were popular, and they listened to what you said about me because you were talking."

"Isn't that just like him?" she asked Camilla with exasperation, as

if they shared his idiosyncrasies with a common insouciance of them.

She passed glasses of punch and a plate of sandwiches.

"You will be sending me a board bill some day," Peter remarked carelessly. "If I don't quite eating here."

Camilla looked up quickly. Avis laughed. "He has the most exaggerated sense of obligation. I ever met. Just because he eats a meal here and I make him stop work long enough to drink a cup of coffee occasionally, he wants me to punch a meal ticket for him. Actually, Camilla, with working so hard to finish that figure, I believe he would starve if someone didn't tell him it was time to eat. And since you are not here to do it, I've taken it upon myself to watch over him a little. We don't want our prize winner to collapse at the last minute, do we?"

"Oh, you women!" Peter made a deprecating gesture. "You do like to baby us. That's because you don't know what it means to supply your soul to something that means more to you than your physical comfort."

Oh, didn't she, thought Camilla. But Peter was talking to Avis—not to her. Unconsciously, he had developed the habit of ending the evening there in Avis' room, eating a bite and discussing most everything with her.

"I am glad you take such good care of him," Camilla offered bravely, but she shrugged. "Avis even once surprised me by saying Peter. 'By the way,' he changed the subject, 'we haven't named the figure yet.' Actually, he had only discussed the matter with Avis, but his comment included both girls."

(To Be Continued)

## About Sea Serpents

Old Mariners Deplore The Unbelief Of Scientists

If scientists possessed faith "the size of a grain of mustard seed," several skippers agreed, they would not scoff at sea serpents.

These salts, during a lively discussion on the mysteries of the deeps, declared the attitude adopted by scientists toward sea monsters had been "without imagination or emotion from the very start."

They chided by name Dr. Roy Chapman Andrews, who said recently the Loch Ness monster probably was only a killer whale, and Dr. William Beebe, who thinks it may be merely a mechanical contraption.

"It's downright ungracious of these distinguished gentlemen," said Captain Thomas W. Sheridan, former superintendent of the New York municipal school "to dispose of the dire denizen of Scotland in such a prosaic manner."

"Why, that sea serpent of Loch Ness has lived the 'news' of the world now for nearly a year. We owe it a debt of gratitude."

"Dr. Andrews and Dr. Beebe," continued Captain Sheridan, "ought to remember the Shakespearean quotation: 'There are more things in heaven and earth—Horatio—than are dreamed of in your philosophy.'"

"And," said Captain Felix Risenberg, sea author, "they ought to remember too, that sea serpents have been earnestly and devoutly believed in by numbers of super-seamen of undoubted veracity since the beginning of time."

"Some of our best literature is about the seeing of these beasts."

Captain Frederick Fender, assistant marine superintendent of the international mercantile marine, said "one of the greatest authorities America ever had on sea serpents" was the late Captain Clausen of the magnetic ship Carnegie.

"He used to tell us by the hour," said Fender, "about seeing sea serpents. He told us once he saw one of them chase a school of whales round a Norwegian fjord until the water boiled with fury and villages miles inland were swept by the waves."

None of these seamen would admit ever having seen a serpent with his own eyes but all agreed that "what scientists need is a grain of faith in sea beasts—and a mile more of forbearance."

It's very embarrassing when one's wife is jealous, and very humiliating when she isn't.

The brink of Niagara Falls is receding at the rate of 2½ feet a year.

## CRAWLING ABOUT WITH LUMBAGO

Here is some useful information for anyone troubled with that uncomfortable complaint, lumbago.

A woman writes: "For years I suffered from lumbago. During wet weather, I could only turn in bed with great effort and pain. I was so stiff and ached so much. Two years ago I had both lumbago and sciatica, and crawled about for a fortnight, feeling very sorry for myself and looking 108 instead of 33. Someone said, 'Try Kruschen Salts,' so I did, and I have taken them ever since, with the result that I hardly ever get a hint of lumbago these days." (Mrs. G. P. O. Why is it that Kruschen is so effective in keeping lumbago at bay? Simply because it goes right down to the root of the trouble and removes the cause, which is an impure bloodstream. The salt in Kruschen keeps the bloodstream pure and vigorous by promoting a clockwise regularity of all the organs of elimination.)

## Little Helps For This Week

"If thou draw out thy soul to the hungry, and satisfy the afflicted soul, then shall thy light rise in obscurity and thy darkness be as the noonday, and the Lord shall guide thee continually." Isaiah 43:10-11.

If thou hast yesterday thy duty done, and today thy strength is good, and thereby cleared firm footing—Whatever clouds make dark to-morrow, sun—Thou shalt not miss thy solitary way.

O Lord who art our guide even unto death, grant us I pray Thee grace to follow Thee wheresoever Thou goest. In little daily duties to which Thou hast called us, bow down our wills to simple obedience, patient under pain or provocation, strict truthfulness of word and manner, humility and kindness. In great acts of heroism, Thou shalt call us to them, uplift us to self-sacrifice, heroic courage, laying down of life for Thy Truth's sake, or for a brother.—C. G. Rossetti.

## Collar Of Pure Gold

Valuable Antique Dating From About 700 B.C. Is Found In Ireland

A collar of pure gold which is believed to have been made about 700 B.C. has been found at Burren, County Clare, Ireland. The discoverer was a local farmer who noticed it glittering in a cleft of rock. The National museum has claimed it as treasure trove. Dr. Mahr, keeper of Irish antiquities in the national museum, has confirmed the belief of its antiquity. The type is well known he said in an interview, and four similar ones are in the museum.

## Drive Against Lotteries

Revealing plans for a drive against Chinese lotteries, a type of gambling which is to be sweeping Winnipeg, city police stated unemployed, in many cases, were waging their relief vouchers in the hope of reaping a sudden fortune, rather than spend them for bread, milk and other necessary provisions.

## Using Diving Bell

With the aid of a great diving bell, Dr. William Beebe plans to go 3,000 feet below the surface of the Atlantic near the Bermudas. He is carrying on the work solely for the purpose of making scientific observations of as large a number of deep sea creatures as is possible.

## Kidney Troubles

came poison to accumulate in the system and bring on persistent Backache, Lumbago, Rheumatism, or Sciatica. Take Gin Pills to restore the kidneys to a healthy condition and eliminate the poison from your system.

**GIN PILLS**  
FOR THE KIDNEYS

## SOUTH EDMONTON BEACH

## Sunday's Ball Game.

A team of ball-tossers left town Sunday afternoon and journeyed to the ball diamond at Rosenthal, tangled with the team of Sod-busters there, and didn't do so good, the final score showing: Rosenthal 12, Town men 8. A return game is billed for the local diamond Sunday Aft. next. The line-up:

Town Team: E. Mayer & George Gitzel catchers; P. Enders and Ed Enders pitchers; O. Oppertbauer 2b; A. Duoholki 3b; O. Miller ss; E. Damhauer rf; S. Grant lf; L. Enders cf; A. Lutz 3b.

Rosenthal: E. Kulak c; J. Kulak p; G. Davies 1b; Al. Davies 2b; J. Hoffman 3b; D. Speers ss; Val M. Kotscherevski rf; E. Kulak lf; Art Davies p; F. Carmichael lf.

## C. W. Young Opens New Store

Mr. C. W. Young, until recently with the E. Young General Store in Stony Plain, is opening an up-to-date Grocery at the premises formerly occupied by Trapp the Baker. Mr. Young is having the place overhauled, and expects to open by the latter part of the week, with a complete stock of fresh goods. The place is being laid out on the American plan, customers having access to the goods displayed on the shelves. Note the new address—Next Carl Fischer's Bootery.

## R. C. Services.

Rev. Father McBriarty, of the Redemptorist Order, Edmonton, will preach Missions at Duffield and Wabamun during the week commencing Sunday May 27.

Rev. Father Kosieski, of Holy Rosary parish, Edmonton, will preach a Mission at Carvel during the week commencing June 10. Sermons will be in English and Polish. On Sunday, June 10, Father Kosieski will offer Holy Mass in Stony Plain at 9.30.

## Producers Demand Commis'n

A commission of investigation on all phases of processing and marketing of live stock has been demanded by the livestock producers of the province in a statement presented to the Stevens Committee at Ottawa. The livestock producers emphasized that their industry in Alberta was in an extremely serious state, and its rejuvenation depended upon four main points, the stabilisation of prices paid producers, the securing of a larger share of the consumer's dollar for the producer, the lowering of transportation and marketing costs, and the widening of markets.

## Looks Like Buying Year.

Total General Motors automotive sales for the first quarter to dealers in Canada and U. S., plus overseas shipments, were 376,604 units, compared with 198,749 in same period in 1933—an increase of 63 p.c. Sales are not all passenger cars, either, which indicates an upturn in the commercial and industrial field. General Motors sales of trucks and commercial cars in Canada for the first 3 months of 1934 showed an increase of 77 p.c. over the same period of 1933.

## The New Agent.

Watkins' bus is again perambulating on its old rounds, under the guidance of the new agent, Mr. Emil Miedelstead. The latter comes from the Hay Lake district and expects to make as big a success of his new business as the former agent, Mr. Gillespie. Mr. Miedelstead has taken up his residence on 2d ave.

## EDMONTON BEACH.

Midnight Frolic, Wed. May 23, 11 P.M.  
MARTIN'S SIX-PIECE ORCHESTRA.

## MAY 24th--VICTORIA DAY.

### TWO BASEBALL GAMES.

THE ROOM Under New Management.  
DANCE IN EVENING.

## Stony Plain and District

Mrs. Samuel. Holt, of Rich Valley, Alberta, who had been visiting here with her parents, Mr. and Mrs. Rudolf Misker, left on Tuesday for her home.

The Comisarow family on Sunday motored down to Viking and paid Bill a visit.

Mr. Jac. Beker spent the week-end with his family in the City.

Having rented the premises he formerly used as a bake-shop, Mr. H. Trapp has moved to the location one door north, where customers are now able to get their fresh bread—white, rye and brown.

On a charge of driving to the public danger, laid under sec. 285 C.C.C., Mr. August Meredith was haled to the Edmonton police court Monday morning. An accident in which Mr. Meredith is said to have been involved, occurred near 102 ave. and 131 street, Edmonton, is said to have been the cause of the charge being laid. When Meredith appeared in court, the case was adjourned.

LOST—1 Leather Brief Case; \$1 reward. Return to Stony Plain Motors.

BUTTER AND EGGS WANTED at The Royal Cafe.

## Mother's Day Service.

The Mother's day program by pupils of United Church Sunday school was given in a reverent, fitting manner to a crowded church. The service was divided into 3 parts—

- 1, Christian homes are happy homes
- 2, Happy families make friendly churches
- 3, Pageant

These were interspersed with special hymns by the different departments of the Sunday school, and 2 readings "Cherry Blossom," by Mary Campbell, and "The Story of Samuel," by Earl Leero.

Those taking part in the pageant "Happy Families in Friendly Churches" were—Spirit of the Home, Nora Kowensky; Spirit of the Church, S. Everett; Mother, Muriel Michael; Father, Walter Larson; Youngest Son, Wm. Siles; Youngest Daughter, Iona Sinner; Teen-age Daughter, Edna Zoch; Young Man (eldest son) Daniel Dale. The organists were Saunders Everett and Marie Clarke.

## When Spring Comes,

Can Camp Days be far behind? The efficient summer camp committee of the Stony Plain Walther League replies "Edmonton Beach is calling you to spend the second week of July at its scenic shores, together with fellow-Leaguers."

Miss Mary Enders, the experienced W.L. camp manager, assures members that the camp will be better than ever. Pastors will have an opportunity to attend at the close of Synod.

Address all inquiries regarding the camp to Miss Mary Enders Stony Plain.

## The Sun's Calendar.

MAY—  
18—Dance, Winterburn Hall.  
20—Ball game on local diamond.  
21—Whit Monday.  
22—Midnight Frolic, Edm. Beach.  
24—Victoria Day.  
Plepic at Holborn.  
Dances, Muir Lake Community.  
31—Co-op. Meeting at Gainford.  
JUNE—  
3—King's Birthday.  
23—Plepic at Duffield.  
24—St. Jean Baptiste Day.

## Spruce Grove News.

Providing the Weatherman gives fair weather, there promises to be a record crowd at Winterburn Hall tomorrow night, the 18th, when Spruce Grove's Community League gives its Novelty dance. A number of handsome prizes are to be awarded, including a big box of chocolates for the admission prize. White's orchestra will be there.

## New Cow-testing Plan.

A dairy herd testing scheme has been put into effect by the Provincial Dept. of Agriculture to take the place of the scheme carried on for some years by the Dominion Gov't, but cancelled last year. Under the new scheme, provision will be made whereby each farmer operating a dairy herd may keep records of each of his cows, and have samples of milk tested every 2 months for butterfat production. The Dept. will pay cost of transportation of samples and provide periodic reports on the herd from which the samples come. Application forms under the new plan are being sent this month to members of former Cow-testing Ass'n's and others from whom inquiries are received. This plan will make possible continuance of the check upon the performance in production of dairy cows in the province.
